Matheus

Senior Software Engineer - Magento 2 | JavaScript/TypeScript | PHP | C# | Angular | AWS

Blumenau, Santa Catarina, Brazil

opiekun.matheus@gmail.com | github.com/opiekun

Summary

Software engineer focused on scalable e-commerce, clean architecture, and user experience. My core expertise is Magento 2; I also build financial applications with Angular, TypeScript, C#, and .NET. I work across frontend and backend systems, integrations, and performance improvements.

Experience

Vertrau Tecnologia

Software Engineer | March 2026 - Present

- Develop and maintain fintech applications for FIDC and receivables management using Angular, TypeScript, and standalone components.
- Build responsive interfaces with PrimeNG, Tailwind CSS, and reusable component patterns.
- Integrate frontend modules with ASP.NET Core services through REST APIs and SignalR.
- Work with backend, product, and design teams on credit operations, reconciliation, CNAB processing, and financial dashboards.
- Use RxJS and shared component libraries to improve frontend performance, maintainability, and usability.

121eCommerce

Software Engineer | May 2022 - December 2025

- Developed and maintained Magento 2 stores, custom modules, and integrations.
- Extended Magento backend features to meet business needs.
- Built responsive layouts, themes, and JavaScript enhancements with design teams.
- Improved site speed, resolved critical bugs, and enhanced the shopping experience.

Compasso UOL

Software Engineer | March 2021 - May 2022

- Deployed and optimized Magento 2 stores on Magento Cloud.
- Built REST and GraphQL integrations for payments, shipping, ERP, and CRM systems.
- Developed custom Magento 2 modules and extended core features.

Experience (continued)

Quick Soft Tecnologia

Software Engineer | February 2020 - March 2021

- Built .NET and C# systems for FIDC receivables, contract lifecycles, and financial data processing.
- Integrated registradoras in the CIP/B3 ecosystem for registration, queries, and reconciliation.
- Implemented validation, transformation, persistence, tracking, and audit rules for credit rights.
- Worked with SQL Server and PostgreSQL to improve query performance and data consistency.

Signativa

Frontend Developer Intern | March 2019 - January 2020

- Supported Magento 1 stores, performance improvements, and security maintenance.
- Helped build APIs, payment and shipping integrations, and custom Magento 1 modules.
